

# ANTI-PATHOGEN AIR PURIFICATION SYSTEM FOR HOSPITALS

KEEP YOUR PATIENTS AND STAFF SAFE

**WAYCLEAR**

# ABOUT WAYCLEAR

---

Let's Talk LED-Powered Peace of Mind

The Wayclear team has been designing innovative solutions for over 25 years, and will continue leading the way to provide US-designed and manufactured products that improve health, safety, economy, and a path to normalcy.

Wayclear technology uses solid-state LED technology with efficacy verified by third party independent laboratory testing. Our LED-based UV-C systems are longer lasting, more effective, highly efficient, and safer to use compared to traditional approaches like mercury vapor UV-C, electrostatically applied chemicals, or mold-prone HEPA filtration systems that require expensive upkeep.

The benefits of LED-based air/surface disinfection systems include low maintenance costs (thanks to over 30,000 available duty hours per LED module), no environmental cleanup concerns as with traditional mercury-based UV lights, no need for filter changes, and instantaneous on/off status without warm-up or cool-down cycles, all within modular packaging that can be placed safely within any room.

Wayclear products are independently tested by Microchem Laboratories, located in Round Rock Texas. Testing demonstrated a Virus reduction of 99.992% using MS2, a more robust surrogate for Coronavirus. Results are independently verified, summarized and explained by PhD microbiologists, and are available as white papers at [www.wayclear.com](http://www.wayclear.com).

# Keep Your Hospital Wayclear

With our proprietary UVC-LED, virus deactivating, technology

Emergency department volume is down nearly 50% as the United States struggles with the Covid-19 epidemic due to fear of contracting Covid-19, leading to increased morbidity and mortality (NEJM Catalyst)

# 12x

Healthcare providers are at a 12x increased risk of contracting COVID-19 than the general population. Risk increases in settings that have inadequate safety measures. (Mass General)

51% of people do not feel comfortable scheduling a medical procedure during the COVID-19 pandemic (Society for Cardiovascular Angiography & Intervention)

As COVID-19 continues to pose a serious health threat around the World, doctors are increasingly concerned about another growing public health crisis. Research suggests that many Americans are shunning hospitals, often out of fear of catching COVID-19, rather than seeking care for illnesses such as cancer, or emergencies such as heart attacks and strokes.

Far beyond the financial benefit to be seen by hospitals through increased patient admissions due to satisfaction when it comes to their safety, is the quality of life benefit that patients will see through keeping up with necessary procedures and health screenings by coming into the hospital. Patient uneasiness over airborne pathogens, and surface hygiene remain persistent even as vaccines roll out, and the pandemic feels closer to an end. Wayclear's filter-less devices will save your hospital millions of dollars, in maintenance upkeep and filter replacements. These funds can be redirected towards additional measures to improve patient care and satisfaction, thus increasing bottom line.

Healthcare facilities deal with people at their most vulnerable. A secondary infection or other health issue arising from poor air quality can have fatal consequences. With units that can eliminate COVID-19, and other pathogens from both air and surfaces, Wayclear's ground-breaking UVC-LED technology implemented in treatment rooms, emergency departments, waiting rooms, and common spaces can help keep staff, essential healthcare providers, and patients, as safe possible.

## In addition to deactivating COVID-19, Wayclear will rid your hospital of:

Bacterial Spores

All DNA and RNA Viruses

Staphylococcus

Volatile Organic Chemicals (VOC)

Mold Spores

Unpleasant Odors

...  
and more

## WAYCLEAR ADVANTAGE

- Light-emitting diodes (LEDs) use 10 x less power than other UV energy sources
- Zero on-going maintenance, no filters required, no added cost of upkeep
- Designed to last for 10 years of continuous use
- Easy to Install - can be outfitted into HVAC systems, mounted on a wall, or simply plugged in and turned on
- Quiet operation
- Devoid of harmful chemical residue and ozone
- Deactivates viruses, mold spores, and bacteria
- Our technology is independently tested, proving 99.99% effectiveness in eliminating COVID-19 in air and on surfaces.

# WAYCLEAR VS LEADING HEPA-FILTER COMPETITOR

10 year price comparison  
for units covering 1,000 sq ft

**7 year cost savings  
with Wayclear:  
\$1979 saved  
per unit**

# Air Disinfection

## CLASSIC

\$2,000

**Unit Size**  
18" x 15" x 3"  
**Room size**  
112-450 Ft<sup>2</sup>  
**Weight**  
15 Lbs

## PRO

\$3,000

**Unit Size**  
24" x 15" x 3"  
**Room size**

**Weight**  
22 Lbs

## PRO +

\$4,500

**Unit Size**  
42" x 15" x 3"  
**Room size**  
1,000-2,500 Ft<sup>2</sup>  
**Weight**  
41 Lbs

## XL

\$20,000

**Unit Size**  
50" x 18" x 18"  
**Room size**  
2,500-10,000 Ft<sup>2</sup>  
**Weight**  
90 Lbs

## Specifications

- Designed and tested to exceed environmental Mil-Spec 810 Standards
- Size and weight vary by model
- Tamper-proof design
- UV-shielded hardware that allows for safe use within populated areas

Power

120 VAC, 12 VDC, 37.5 VDC

Operating Humidity

95% non-condensing

Air Flow (cfm)

60
