

ANTI-PATHOGEN AIR PURIFICATION SYSTEM FOR HOTELS

KEEP YOUR GUESTS AND EMPLOYEES SAFE

WAYCLEAR

ABOUT WAYCLEAR

Let's Talk LED-Powered Peace of Mind

The Wayclear team has been designing innovative solutions for over 25 years, and will continue leading the way to provide US-designed and manufactured products that improve health, safety, economy, and a path to normalcy.

Wayclear technology uses solid-state LED technology with efficacy verified by third party independent laboratory testing. Our LED-based UV-C systems are longer lasting, more effective, highly efficient, and safer to use compared to traditional approaches like mercury vapor UV-C, electrostatically applied chemicals, or mold-prone HEPA filtration systems that require expensive upkeep.

The benefits of LED-based air/surface disinfection systems include low maintenance costs (thanks to over 30,000 available duty hours per LED module), no environmental cleanup concerns as with traditional mercury-based UV lights, no need for filter changes, and instantaneous on/off status without warm-up or cool-down cycles, all within modular packaging that can be placed safely within any room.

Wayclear products are independently tested by Microchem Laboratories, located in Round Rock Texas. Testing demonstrated a Virus reduction of 99.992% using MS2, a more robust surrogate for Coronavirus. Results are independently verified, summarized and explained by PhD microbiologists, and are available as white papers at www.wayclear.com.

Keep Your Hotel Wayclear

With our proprietary UVC-LED, virus deactivating, technology

66% of Americans do not feel comfortable staying in a hotel right now
(American Hotel & Lodging Association Feb. 2021)

50% of U.S. hotel properties are projected to stay empty in 2021
(American Hotel & Lodging Association Feb 2021)

67 percent said that in order to consider staying in a hotel, the hotel staff should disinfect everything that people might touch in a hotel room.
(hospitalitynet.org)

Concerns about surface sanitation and air quality have existed far before the COVID-19 pandemic began - however, now, it is at the forefront of every guests mind. The COVID-19 pandemic has been especially crippling for the hotel industry due to several lock downs and travel restrictions all over the world. Even as restrictions have been lifted, bookings have not improved enough for hotels to stay prosperous; 66% of Americans still do not feel comfortable staying at hotels. Guests will no longer simply judge a hotel on factors like amenities, food, room quality, and price - they are looking at which hotels make their safety a priority. Gaining guest trust is of key importance for hotels hoping to recover their losses and continue to thrive.

Wayclear's zero maintenance, near silent, and 99.99% effective air purification technology effectively increases airflow, and neutralizes not only COVID-19, but any and all viruses, bacteria, and allergens. Wayclear's surface disinfection technology implemented in rooms between guest visits will effectively destroy all potential traces of viruses and bacteria left behind on room surfaces. Every guest checking in, will have confidence that their safety has been prioritized, and their room is as sterilized as possible.

Wayclear technology's lack of filters, and thus lack of maintenance costs, provide hotels with thousands of dollars in annual upkeep savings. We pride ourselves in bringing back peace of mind so that the general population feels safe doing what they enjoy, and businesses continue to prosper.

In addition to deactivating COVID-19, Wayclear will rid your hotel of:

Bacterial Spores

All DNA and RNA Viruses

Staphylococcus

Volatile Organic Chemicals (VOC)

Mold Spores

Unpleasant Odors

...
and more

WAYCLEAR ADVANTAGE

- Light-emitting diodes (LEDs) use 10 x less power than other UV energy sources
- Zero on-going maintenance, no filters required, no added cost of upkeep
- Designed to last for 10 years of continuous use
- Easy to Install - can be outfitted into HVAC systems, mounted on a wall, or simply plugged in and turned on
- Quiet operation
- Devoid of harmful chemical residue and ozone
- Deactivates viruses, mold spores, and bacteria
- Our technology is independently tested, proving 99.99% effectiveness in eliminating COVID-19 in air and on surfaces.

WAYCLEAR VS LEADING HEPA-FILTER COMPETITOR
