

ANTI-PATHOGEN AIR PURIFICATION SYSTEM FOR MEDICAL CLINICS

KEEP YOUR PATIENTS AND STAFF SAFE

WAYCLEAR

ABOUT WAYCLEAR

Let's Talk LED-Powered Peace of Mind

The Wayclear team has been designing innovative solutions for over 25 years, and will continue leading the way to provide US-designed and manufactured products that improve health, safety, economy, and a path to normalcy.

Wayclear technology uses solid-state LED technology with efficacy verified by third party independent laboratory testing. Our LED-based UV-C systems are longer lasting, more effective, highly efficient, and safer to use compared to traditional approaches like mercury vapor UV-C, electrostatically applied chemicals, or mold-prone HEPA filtration systems that require expensive upkeep.

The benefits of LED-based air/surface disinfection systems include low maintenance costs (thanks to over 30,000 available duty hours per LED module), no environmental cleanup concerns as with traditional mercury-based UV lights, no need for filter changes, and instantaneous on/off status without warm-up or cool-down cycles, all within modular packaging that can be placed safely within any room.

Wayclear products are independently tested by Microchem Laboratories, located in Round Rock Texas. Testing demonstrated a Virus reduction of 99.992% using MS2, a more robust surrogate for Coronavirus. Results are independently verified, summarized and explained by PhD microbiologists, and are available as white papers at www.wayclear.com.

Keep Your Medical Clinic Wayclear

With our proprietary UVC-LED, virus deactivating, technology

40% of Americans do not feel comfortable visiting the doctor's office while COVID-19 is a risk.

Over 30% of Americans have not had their routine check up since the COVID-19 Pandemic began.

According to the Society for Cardiovascular Angiography & Intervention (2021)

Fear of the COVID-19 virus, has led many to be wary of visiting their doctor's office for routine check-ups and/or important screenings. Even with the implementation of stricter hygiene and distance rules, patients feel unsafe, and essential health providers remain at heightened risk. Telemedicine, while an important step in bringing patients to their providers safely, often doesn't work well with populations most at risk, due to issues with technology, importance of direct interaction for comfort, or health problems that simply cannot be addressed through a screen.

Far beyond the financial benefit to be seen by medical clinics through increased patient attendance due to satisfaction when it comes to their safety, is the quality of life benefit that patients will see through keeping up with treatments and preventative care. Patient uneasiness over airborne pathogens, and surface hygiene remain persistent even as vaccines roll out, and pandemic feels closer to an end. Wayclear is all about meeting the ever-changing disinfection needs of our increasingly complex world, and that includes our post-COVID future.

In addition to deactivating COVID-19, Wayclear will rid your medical clinic of:

Bacterial Spores

All DNA and RNA Viruses

Staphylococcus

Volatile Organic Chemicals (VOC)

Mold Spores

Unpleasant Odors

...
and more

WAYCLEAR ADVANTAGE

- Light-emitting diodes (LEDs) use 10 x less power than other UV energy sources
- Zero on-going maintenance, no filters required, no added cost of upkeep
- Designed to last for 10 years of continuous use
- Easy to Install - can be outfitted into HVAC systems, mounted on a wall, or simply plugged in and turned on
- Quiet operation
- Devoid of harmful chemical residue and ozone
- Deactivates viruses, mold spores, and bacteria
- Our technology is independently tested, proving 99.99% effectiveness in eliminating COVID-19 in air and on surfaces.

Air Disinfection

CLASSIC

\$2,000

Unit Size
18" x 15" x 3"
Room size
112-450 Ft²
Weight
15 Lbs

PRO

\$3,000

Unit Size
24" x 15" x 3"
Room size
