

# ANTI-PATHOGEN AIR PURIFICATION SYSTEM FOR NURSING HOMES

KEEP YOUR PATIENTS AND STAFF SAFE

**WAYCLEAR**

# ABOUT WAYCLEAR

---

Let's Talk LED-Powered Peace of Mind

The Wayclear team has been designing innovative solutions for over 25 years, and will continue leading the way to provide US-designed and manufactured products that improve health, safety, economy, and a path to normalcy.

Wayclear technology uses solid-state LED technology with efficacy verified by third party independent laboratory testing. Our LED-based UV-C systems are longer lasting, more effective, highly efficient, and safer to use compared to traditional approaches like mercury vapor UV-C, electrostatically applied chemicals, or mold-prone HEPA filtration systems that require expensive upkeep.

The benefits of LED-based air/surface disinfection systems include low maintenance costs (thanks to over 30,000 available duty hours per LED module), no environmental cleanup concerns as with traditional mercury-based UV lights, no need for filter changes, and instantaneous on/off status without warm-up or cool-down cycles, all within modular packaging that can be placed safely within any room.

Wayclear products are independently tested by Microchem Laboratories, located in Round Rock Texas. Testing demonstrated a Virus reduction of 99.992% using MS2, a more robust surrogate for Coronavirus. Results are independently verified, summarized and explained by PhD microbiologists, and are available as white papers at [www.wayclear.com](http://www.wayclear.com).

# Keep Your Nursing Home Wayclear

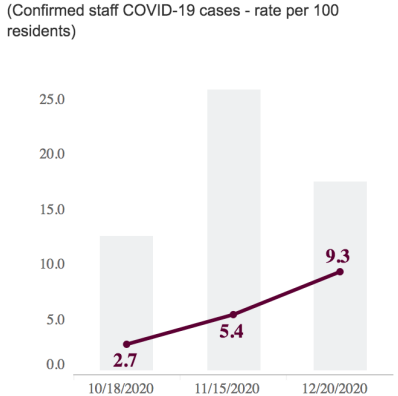

With our proprietary UVC-LED, virus deactivating, technology

### Nursing Home Resident Cases

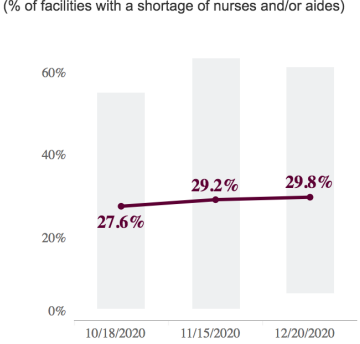

In the last month (four weeks ending 12/20/2020) in the United States, on average, there were 10.8 COVID-19 cases per 100 nursing home residents.

### Staff COVID-19 Cases

In the last month (four weeks ending 12/20/2020) in the United States, on average, there were 9.3 nursing home staff cases per 100 residents.

### Staffing Shortages

In the last month (four weeks ending 12/20/2020) in the United States, on average, 29.8% of nursing homes had a shortage of direct care workers.

Nursing home residents are among the most vulnerable population to sickness from airborne pathogens, including COVID-19. Shown in the graphs to the left, there has been a consistent rise in COVID-19 cases in residents, as well as staff. Consequential staffing shortages due to risk of illness, has further increased the shortage the nursing home industry has previously seen. The effects of this include, high turnover, financial set backs to facilities, lower quality of medical care, higher rates of treatment errors, and compromised quality of life of residents.

In choosing a nursing home to bring loved ones, prospective residents and their families will no longer look just for quality of care, activities offered, and comfort of rooms; they will be looking to make sure residents are as safe as possible from the risk of airborne pathogens. With technology that can eliminate COVID-19, and other pathogens, from both air and surfaces, Wayclear's ground-breaking UVC-LED technology can help keep staff, and residents, safe, healthy, and happy. Wayclear is meeting the ever-changing disinfection needs of our increasingly complex world—and that includes our post-COVID future.

## In addition to deactivating COVID-19, Wayclear will rid your nursing home of:

Bacterial Spores

All DNA and RNA Viruses

Staphylococcus

Volatile Organic Chemicals (VOC)

Mold Spores

Unpleasant Odors

... and more

## WAYCLEAR ADVANTAGE

- Light-emitting diodes (LEDs) use 10 x less power than other UV energy sources
- Zero on-going maintenance, no filters required, no added cost of upkeep
- Designed to last for 10 years of continuous use
- Easy to Install - can be outfitted into HVAC systems, mounted on a wall, or simply plugged in and turned on
- Quiet operation
- Devoid of harmful chemical residue and ozone
- Deactivates viruses, mold spores, and bacteria
- Our technology is independently tested, proving 99.99% effectiveness in eliminating COVID-19 in air and on surfaces.

# WAYCLEAR VS LEADING HEPA-FILTER COMPETITOR

10 year price comparison  
for units covering 1,000 sq ft

**Weight**  
22 Lbs

## PRO +

\$4,500

**Unit Size**  
42" x 15" x 3"  
**Room size**  
1,000-2,500 Ft<sup>2</sup>  
**Weight**  
41 Lbs

## XL

\$20,000

**Unit Size**  
50" x 18" x 18"  
**Room size**  
2,500-10,000 Ft<sup>2</sup>  
**Weight**  
90 Lbs

## Specifications

- Designed and tested to exceed environmental Mil-Spec 810 Standards
- Size and weight vary by model
- Tamper-proof design
- UV-shielded hardware that allows for safe use within populated areas

Power

120 VAC, 12 VDC, 37.5 VDC

Operating Humidity

95% non-condensing

Air Flow (cfm)

60
